Meeting records 📄 Transcript 🎤 Recording

Summary

Strategy for win-loss analysis and adoption reporting was discussed with consensus reached on coaching tool implementation.

Win-Loss Analysis Strategy

The win-loss library requires combining manual renewal record data with Customer Success Manager insights. The process requires validating current requirements and automation opportunities before broader leadership presentations.

Portfolio Reporting Metrics

Leadership requires a portfolio view summarizing total attrition and wins rather than individual stories. Merging tracking versions and standardizing questions prepares the team for upcoming business reviews.

Relationship Coaching Tool

Consensus established that the new relationship maturity scoring mechanism will function as an optional qualitative coaching tool for managers. This avoids mandating the tool as a performance metric.

Rate this Summary: [Helpful](#) or [Not Helpful](#)

Decisions

ALIGNED

- **Win/loss review scaling paused** The manual win/loss review process scaling is paused to allow for leadership validation and refinement of manual procedures.
- **Process trigger point defined** The process trigger is established as a renewal closed event of a certain threshold, ensuring all attrition is captured regardless of Red account status.
- **Legacy communication channel sunset** The legacy 'pace re' Slack channel is deprecated to prioritize collaboration exclusively within Red account channels.
- **Process data responsibility assigned** Responsibility for data entry and process tasks is assigned to Program Leads instead of CSMs.
- **Heat map tool optional usage** The heat map coaching tool is defined as an optional resource for manager one-on-ones, rather than a mandatory performance metric.
- **Tool format baseline established** The proposed tool format is established as the baseline, with specific weighting criteria to be determined at a later time.
- **Adoption play creation scope limited** The strategy for adoption plays is restricted to utilizing existing methods managed by Kathleen, rather than generating new ones.

We've **updated the Decisions section** using your feedback.

Next steps

- ☐ [Brandi Rajski] Validate Story Process: Review the attrition story format and questions collected in the Google sheet to ensure accuracy before scaling. This will validate the data collection process.
- ☐ [Ilona Davydova, Adrian Fivaz] Coordinate Data Input: Collaborate on data enrichment for Mad Enterprise and Commerce to ensure a full data set. This meeting will align the data input processes.
- ☐ [Joreal Whitfield] Invite to Meeting: Add Ilona Davydova to the upcoming meeting with Will and Bernard to discuss red account management issues.
- ☐ [Brandi Rajski] Present Attrition Process: Present the manual attrition story process to the leadership team including Rick, Kathleen, and Colin to obtain formal input.
- ☐ [Brandi Rajski, Felix, Stephanie] Audit CSG Notes: Meet with Felix and Stephanie to evaluate existing Slack skills for auditing CSG notes and hashtags. This will help standardize data quality checks.
- ☐ [The group] Review Red Dashboard: Provide feedback on the red account dashboard within the communication thread to finalize the view and functionality.
- ☐ [Patrick Lynn] Sunset Pace Channel: Decommission the legacy Pace Red channel and transition communication exclusively to the active red account Slack channels.
- ☐ [Brandi Rajski] Sunset Template: Migrate data from individual tracking version into the shared team template.
- ☐ [Carly] Schedule Forecast Review: Coordinate a meeting with Brandi to conduct a review of the forecasting element.
- ☐ [The group] Attend Services Call: Clarify process during the meeting with retail and consumer goods services.
- ☐ [Jenna Ramsland] Present Heat Map: Share the heat map tool with Brandi and team leaders to gather feedback.
- ☐ [Molly Ross] Align CSS Scores: Connect with Kendall and Chrissy to discuss CSS score connections and alignment.
- ☐ [The group] Update Google Sheet: Finalize weekly updates to the tracker by end of business on Mondays.

Details

Did the screenshots in this section make your notes better or worse?

- **Meeting Opening and Quorum:** The meeting began with the participants checking in and discussing the previous Memorial Day holiday. Molly Ross confirmed that a quorum was present, noting that 9 of 18 members were in attendance, and decided to proceed with the agenda items.

OWNER	Team Leads	MEASURE	KPIs	General Open Items	Key Resources & Links
Win/Loss Lead Harris Action First					
M2.0	Ilona Davydova	Offense: Win/Loss Review	A2 head 2 recurring patterns identified across loss stories 1. CSM knowledge base usage A2 head 30% of CSMs reference the knowledge base before a renewal	OPEN May-12 Develop and action each process - 1) Opportunities with strong and no 8 in Red of Green headline 2) Opportunities with forecasted risk and no rating. On a quarterly basis, review to ensure alignment across sales, success and renewal Partner with Kate Stevenson and needed team members to refine existing dashboard Take the process flow for each of the measures, build to ensure the process is being followed. Develop the process of updating then non-actionable. Shift from investigating Renewals Report to Data Regions for age calls investigate concern re: lack of Red - capture Precautionary or closed. Frequency of meetings - build into the Ops call. Impact tracking of all plays - created up version of Ops - ideally a Dashboard at the Account Owner Role level. - **Win-Loss Analysis Strategy:** Ilona Davydova recapped the ongoing manual effort to develop a win-loss analysis, which involves collecting information from renewal records and supplementing it with insights from lead OUs and Customer Success Managers (CSMs). The objective is to create a library of stories to be presented to Brandi Rajski and utilized during Business Reviews (MBRs).
- **Win-Loss Data Inputs and Formatting:** Ilona Davydova explained that they established a format for data collection, instructing lead OUs on manual inputs while automating data from renewal records into a central Google Sheet. Ilona Davydova provided sample stories to Brandi Rajski to gather feedback on

whether the current format accurately captures necessary information before further stories are constructed ([00:00:56](#)).

- **Win-Loss Story Construction:** To build the attrition stories, Ilona Davydova filtered renewal records for the digital and commerce teams, selecting records with an attrition amount of 100k or greater (00:04:32). They then supplemented these records with additional context from CSMs, such as Stephanie, to address discrepancies and ensure accuracy (00:05:44). The resulting stories are framed around a consistent structure: the initial situation, the mitigation response, the outcome, and final learnings (00:08:54).

- **Win-Loss Scaling and Objectives:** Ilona Davydova emphasized that the goal of this exercise is to build internal capability in constructing these stories, identifying which programs help save accounts, and uncovering themes in attrition. Ilona Davydova intends to incorporate "hashtag guidance" to highlight discrepancies or missed opportunities, ultimately providing a summary of how the quarter ended and which programs were effective ([00:10:15](#)).
- **Integration with Red Accounts:** Molly Ross inquired whether Ilona Davydova had consulted the Red Accounts team to understand their existing processes. Ilona Davydova confirmed they had connected with Bernard and Christie to review their reports, but noted that because those reports were specific to Red Accounts, they had to anchor the current analysis to renewal records instead ([00:12:37](#)).
- **Scaling Process Testing:** Adrian Fivaz suggested that the next step should involve workstream leads testing the manual process—utilizing the dashboard, populating the Google Sheet, and applying Slack skills—to validate the approach before a broader rollout. Molly Ross added that they must coordinate to ensure this work is assigned to the appropriate team members, specifically suggesting

that Program Leads (PLs) should take the first step rather than burdening CSMs ([00:13:52](#)).

- **Data Validation and Manual Requirements:** Brandi Rajski expressed concern regarding the manual nature of the current process, noting that they should not scale the effort until specific steps are streamlined. Brandi Rajski insisted on validating the current requirements and potential automation opportunities before presenting the process to leadership, such as Rick, Kathleen, and Colin ([00:16:17](#)).
- **Technical Refinement of Renewal Records:** Ilona Davydova clarified that they used formulas to construct hyperlinks for renewal opportunities because they were not readily available, which made referencing the records easier. Ilona Davydova emphasized that while some inputs are manual, they are working to automate as much as possible and identify necessary data fields ([00:18:26](#)) ([00:21:41](#)).
- **Portfolio and Win Reporting:** Brandi Rajski highlighted the need for a "portfolio view" to summarize attrition (e.g., total attrition for commerce) for leadership, rather than just individual success stories ([00:20:33](#)). Additionally, Brandi Rajski noted that the current focus is on attrition, but they must also build out reporting for "wins"—renewals closed with zero attrition—to have a complete view of the portfolio ([00:22:57](#)).

- **Anchoring Workflow to Red Accounts:** Joreal Whitfield suggested triggering the data collection workflow whenever the status of a Red Account changes, such as moving from "triaging" to "closed" (00:23:58). Brandi Rajski countered that while they could anchor to Red Accounts, approximately 20% of attrition occurs without a Red Account, so the primary trigger must remain the closure of a renewal record of a certain threshold (00:26:31).
- **Alignment on Questions:** The group discussed the need to align on the specific questions used in the analysis, merging past efforts and individual ideas to ensure they are consistent across teams (00:28:16). Molly Ross mentioned that comparing the different versions currently in use will help them arrive at a final set of questions before the upcoming MBR with Katherine (00:29:13).
- **Red Account Dashboard Feedback:** Molly Ross directed the group to a new dashboard created by Kate, which provides visibility into Red Accounts, including forecasted attrition and programmatic plays (00:31:13). The team agreed that they need to solicit feedback on this dashboard and determine if a similar view can be created to track CSG note hashtags (00:32:27).

- **CSG Note Audit:** Brandi Rajski suggested rethinking the purpose of CSG notes, proposing that they be used for auditing risk rather than as free-text fields. Brandi Rajski recommended meeting with Felix and Stephanie to discuss utilizing Slack

skills to audit CSG notes and hashtags on the Red Account records ([00:33:26](#)) ([00:35:21](#)).

- **Tableau Attrition Council Update:** Adrian Fivaz reported that the Tableau Attrition Council successfully kicked off last Friday, documenting the process in the canvas and scaling the program out to additional clouds ([00:35:21](#)).
- **ARI Coordination and Channel Management:** Patrick Lynn provided an update on ARI (Attrition/Renewal) coordination, noting that they are sunsetting the legacy "pace re" channel and will focus exclusively on Red Account channels for communication. Patrick Lynn also noted that they are policing data quality by ensuring every Red Account record has an associated Slack channel ([00:37:44](#)).
- **Data Sourcing Challenges:** Patrick Lynn discussed the challenges of the initial setup phase, specifically the difficulty of sourcing data from multiple fragmented locations ([00:38:43](#)). They plan to hold a second enablement session when Carly returns from PTO to help representatives get up to speed ([00:39:36](#)).
- **Consolidating Tracking Versions:** Molly Ross and Patrick Lynn discussed the need to merge different versions of the tracking spreadsheet (specifically Brandi Rajski's version and the one used by the team) to avoid duplication ([00:40:35](#)). Brandi Rajski offered to sunset their version once the transition is complete ([00:41:18](#)).
- **Budget and Pipeline Forecasting:** Brandi Rajski and Patrick Lynn discussed the need to focus on budget and pipeline forecasting. They planned a follow-up meeting between Brandi Rajski and Carly to address the forecasting elements ([00:42:51](#)).
- **Retail and CG Services Update:** Molly Ross mentioned a scheduled call for the following day with Retail and CG services to determine their process and see if they can align with existing services frameworks rather than creating a new one ([00:43:38](#)).
- **Swap and Advisory Metrics:** Molly Ross discussed metrics regarding swaps, advising that they should measure that CSMs are proposing swaps or trials and reviewing them with managers, rather than setting specific monetary targets for individual CSMs ([00:44:38](#)). The group reached a consensus that this metric is more appropriate for Program Leads (PLs) or leadership review ([00:45:36](#)).
- **Relationship Heat Map / Scoring Tool:** Jenna Ramsland presented a concept for a "heat map" or scoring mechanism to assess signature relationship maturity ([00:46:30](#)). The participants agreed that this should be an optional, qualitative

coaching tool for one-on-ones between CSMs and managers, rather than a mandatory performance metric. Brandi Rajski suggested that if utilized, the results could be loaded into a notebook to help identify broader trends and themes across the portfolio ([00:47:33](#)) ([00:52:43](#)).

- **Usage and implementation of the coaching and prioritization tool:** Jenna Ramsland proposes that the use of the new tool should be a baseline requirement for Lead CSMs who handle renewals over \$1 million, while remaining optional for other users as a coaching or promotional resource. The group discusses the necessity of weighting criteria within the tool to account for factors such as risk and Annual Order Value (AOV), with Jenna Ramsland noting that they completed the tool for the NIOU account in 10 minutes ([00:55:18](#)). Adrian Fivaz expresses support for the tool, noting that it will help team members prioritize their focus while managing their portfolios ([00:56:12](#)).
- **Tracking CSS engagements for Q2:** Kendel Ringenberg explains that phase one accounts for Q2 have been identified, and team leads will support their teams in opening CSS engagements. The strategy involves tracking these engagements using specific hashtags such as "adopt" or "implement," which are applied based on the reasons for low CSS scores and the specific needs of the account ([00:56:52](#)).
- **Definition of responsibilities regarding adoption plays:** Brandi Rajski and Kendel Ringenberg clarify that their team is responsible for providing the construct to capture "adopt" and "implement" tags, but the definition of specific phase one accounts should be coordinated through Kathleen's adoption method ([00:56:52](#)). Molly Ross and Brandi Rajski confirm that they are not creating new plays to drive adoption; rather, they are establishing a way to tag activities when plays are already being run to mitigate attrition ([00:58:06](#)). Adrian Fivaz notes that individual contributors have requested information on specific plays and ideas to drive adoption, and the group agrees that communicating these options is part of the broader adoption workstream led by Kathleen ([00:58:51](#)).
- **Identification of accounts and workflow alignment:** Kendel Ringenberg identifies that each group has flagged approximately 10 accounts that meet specific criteria, including a renewal, a CSS score below 61, and a Sales and Service AO value above 70%. Brandi Rajski, Kendel Ringenberg, and Molly Ross discuss the need to ensure these efforts do not overlap with, or contradict, the work already conducted by Chrissy and Kathleen. Molly Ross commits to connecting with Kendel and Chrissy to align on these identified accounts and finalize the demarcation of responsibilities ([00:59:34](#)).
